RAILWAY TO THE PACIFIC. - The project of : continental Railway north of the Isthmusses, is not confined to the United States. British statesen are considering the practicability of a line from Halifax via Quebec over the British Pro-vinces, to reach the Pacific at Vancouver's Is-land, or on the borders of the Hudson's Bay Company's territories. A powerful article in the Army and Navy Register advocates the immediate construction of such a road, and alleges that the British Government has taken the matrealready into serious consideration. Halifax, the Atlantic depot, is one of the finest natural harbors on the Continent, capable of containing he whole British Navy, and were a railway formed across the country from that point, it would open up a line of communication with the coasts of the Pacific, preventing further expense of search for a North-west passage to the East adia Company's territories in Asia.

Reports were made of the practicability of the and from Halifax to Quelece, and a distinguished British officer and engineer has published a pamphlet on the importance and feasibility of ing the line on to the Pacific. The advanage proposed by the railway, is the connection of the two oceans by a line wholly on ground be-longing to British Colonists or still in the hands of government, unlocated. The expense of search for a north-west passage would, it is esti-mated, in twenty-five years build the road, inde-pendent of other considerations, while the creations of the road would open up the country to Provinces by the unpropitious state of trade and industrial prosperity.

it would not be strange if, while we are disrament should construct a rival, the result of which would be to despoil us of a prestige of commercial and political power of which only an plarged imagination can conceive. The Brith Government, like capitalists, says but little a advance of areat contemplated works. It is leeply alive to the necessity of some grand novement by which to divert the minds of its N.

American Colonists from the ripening sentiment annexation to our Union; as also to infuse a ew commercial and industrial life into those onies. Nothing could better effect this, than such a national work, alike vital to the prosper-ty of the Provinces, and the safety of the British Empire. We give the facts and probabilities, for the reflection of our own statesmen and gov-erament. If they wish to be rivalled by the most dangerous power on earth, let them delay our own Continental road. If the blow he not at once struck, its greatness and glory may be, if not altogether lost, forever divided.—[N. Y.

and altogether lost, forever divided.—[N. Y. Sun.

AMERICAN MANUFACTURES.—We have observed for some time that the demand in England for various articles of American manufacture and the result of American inventive genius, has existed and been increasing to a flattering extent. Lately an exhibition of four American postoons took place before the Dake of Wellington, Sir Charles Napier and others. The Duke and other distinguished military gentlemen present were so satisfied of their superiority, and adaptation to transporting artillery and troops of them, against the served of the postoons to the seat of war in ledit, and the East India Company have anapassed their intention of giving a further order for a large supply of them.—[th.

SLAVES FOR CALIFORNIA.—The National Erasty:—We are told that several slave droves have been sent out from the South, and that in
